

# STOKE HAMMOND PARISH COUNCIL FINANCIAL AND MANAGEMENT RISK ASSESSMENT

Risk assessment is a systematic general examination of business activities and operations (including working conditions) that will enable the Council to identify any, and all, potential risks inherent in their activities and operations. Based on a recorded assessment, the Council should then take all necessary steps to eliminate or, where this is not possible, reduce the risks, insofar as is reasonably practicable to do so.

This document has been produced to enable the Parish Council to assess the financial, management and other business risks that it faces and to satisfy itself and others that it has taken adequate steps to control them. In conducting this exercise, the following plan was followed:

- Identify the activities and operations to be reviewed
- Identify the hazards and determine the nature (who is at risk, from what and how) of the risks they present
- Eliminate risks where possible and implement appropriate risk control strategies to manage the residual risks record all findings
- Record all findings, regularly monitor and review as necessary
